

Medi-Cal Physician-Administered Drug and Vaccine Acquisition Cost Survey Informational Meetings

The California Department of Health Care Services is conducting an acquisition cost study for physician-administered drugs and vaccines. The study will give the Department information regarding the cost to acquire physician-administered medications for the Medi-Cal population.

The Department has retained Myers and Stauffer LC to perform the acquisition cost study. Myers and Stauffer will be conducting informational meetings via telephonic/Internet-based webinars. At these meetings, representatives of sampled providers will hear more about the survey process, what data is being requested and will have a chance to ask

questions about the survey forms. These meetings will be ideally suited for purchasing and/or billing personnel that will be responsible for responding to the acquisition cost survey.

Everyone is invited to attend one of these meetings. If you are unable to attend a training session and have questions about the survey, please contact Myers and Stauffer.

For more information, please call:
