This section covers the billing procedures for the administration of vaccine/toxoids, and immune globulin, serum, or recombinant prophylaxis services.

**Important Notice and TAR Requirement**

All of the listed vaccines and respective CPT® codes may be billed if recommended by the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), for approved indications, dosages and usages. An approved Treatment Authorization Request (TAR) is required for off-label use to justify medical necessity. It must meet current standards of practice, current medical literature or treatment guidelines, in accordance with statutory requirements (California Code of Regulations [CCR] Title 22, Section 51313(c) (4)). Billing codes and utilization management criteria are listed with each code. Experimental services are not a benefit (CCR, Title 22, Section 51303 (g)). Investigational services are covered in accordance with statutory requirements (CCR, Title 22, Section 51303 (h)). Authorization is required for dosages exceeding the maximum recommended dosages as approved by the FDA.

**Reimbursement Methodology**

Vaccines are reimbursed at the Medicare rate of reimbursement when established and published by the Centers for Medicare & Medicaid Services (CMS) or the pharmacy rate of reimbursement when the Medicare rate is not available. The Medicare rate is currently defined as average sales price (ASP) plus 6 percent. The pharmacy rate is currently defined as the lower of (1) the National Average Drug Acquisition Cost (NADAC) or, when the NADAC is not available, the wholesaler acquisition cost (WAC) plus 0 percent; (2) the federal upper limit (FUL); or (3) the maximum allowable ingredient cost (MAIC). For more information on the pharmacy rate of reimbursement please refer to the Pharmacy provider manual section titled Reimbursement.

**Billing Guidelines**

According to national coding guidelines, providers should report immunization services by listing the applicable immunization administration CPT code(s) in addition to the vaccine/toxoid CPT code(s). Reimbursement is determined by the cost of the immunization, plus the physician’s administration fee. Only one administration fee will be reimbursed per immunization regardless of the quantity reflected on the claim line.
Special billing procedures apply to vaccines administered to persons under 19 years of age, who are eligible for the Vaccines For Children (VFC) Program. Since the VFC program supplies vaccine/toxoid product(s) at no cost to the provider, Medi-Cal will only reimburse a provider for the cost of administering a VFC-supplied dose. To bill Medi-Cal for the VFC dose administration fee, VFC providers shall report the vaccine/toxoid product code(s) with a modifier code of “SL”, which identifies the service as a “state-supplied vaccine”. Each CPT vaccine product code billed with a “SL” modifier is reimbursed separately for a VFC dose administration fee. Please refer to VFC section of the manual for additional details.

Vaccines/toxoids for a high-risk population must be reported with a modifier “SK”. Providers must document in the Remarks field (Box 80)/Additional Claim Information field (Box 19), or on an attachment to the claim, the reason why the patient is considered high-risk.

All vaccines recommended by ACIP are a Medi-Cal benefit including for the purpose of employment, school, immigration or sports. In addition, if a beneficiary meets an ACIP-recommended indication, such as, age or a risk factor, Medi-Cal covers the indicated vaccine.

Immunizations are also covered under The Presumptive Eligibility for Pregnant Women (PE4PW) program which allows Qualified Providers to grant immediate, temporary Medi-Cal coverage for ambulatory prenatal care and prescription drugs for conditions related to pregnancy to low-income, pregnant recipients, pending their formal Medi-Cal application. PE4PW is designed for California residents who believe they are pregnant and who do not have Medi-Cal coverage for prenatal care. For additional details, please visit the Presumptive Eligibility for Pregnant Women section of the manual.

**Vaccine Immunization Administration Codes**

The following CPT codes are reimbursable for immunization administration of any vaccine that is not accompanied by face-to-face physician or qualified health care professional counseling to the patient/family or for administration of vaccines to patients over 18 years of age:

- 90471 Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); 1 vaccine (single or combination vaccine/toxoid)
- 90472 each additional vaccine (single or combination vaccine/toxoid) (List separately in addition to code for primary procedure)
- 90473 Immunization administration by intranasal or oral route; 1 vaccine (single or combination vaccine/toxoid)
- 90474 each additional vaccine (single or combination vaccine/toxoid) (List separately in addition to code for primary procedure)
The following CPT codes are reimbursable for immunization services when the physician or qualified health care professional provides face-to-face counseling of the patient/family during the administration of a vaccine.

- 90460 Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered
- 90461 each additional vaccine or toxoid component administered (list separately in addition to code for primary procedure)

**Free Vaccines For Children (VFC) Program**

Because the VFC program provides vaccine/toxoid product(s) at no cost to a VFC provider, Medi-Cal will only reimburse a VFC provider for the cost of administering a VFC dose and not for the dose itself. According to national CPT code guidelines, immunization services are usually reported by using both the vaccine/toxoid code(s) and the vaccine immunization administration code(s). To report a VFC immunization service to Medi-Cal, providers should list each administered vaccine/toxoid product code with a modifier code of “SL”, which identifies the dose as a “state-supplied vaccine”. A separate VFC administration fee will be reimbursed for each vaccine/toxoid product code that is listed with a “SL” modifier on the claim.

Medi-Cal does not reimburse for the cost of a vaccine product that is available through the VFC program but purchased from a non-VFC source and administered to a VFC-eligible person except when justified. A provider’s non-enrollment in the VFC program is not a justified exception. Valid exceptions include documented cases of a VFC vaccine supply shortage due to a disease epidemic, vaccine manufacturing or delivery problems, or instances when the beneficiary does not meet special circumstances required by the VFC program for the vaccine billed. Providers must indicate a justified exception requiring the administration of a non-VFC dose in the **Remarks** field (Box 80)/ **Additional Claim Information** (Box 19) of the claim.

Providers should not report immunization services with an Evaluation and Management (E/M) service code (e.g. office, outpatient, or preventive medicine visit, etc.) unless the provider has also completed a significant and separately identifiable E/M service at the same time. The separate E/M service must be thoroughly documented in the beneficiary’s medical record, and the claim is subject to audit and recoupment of reimbursement.
Free Vaccines from Source Other than VFC Program

Providers bill CPT code 90471 (immunization administration; one vaccine) to Medi-Cal to be reimbursed for the administration of vaccines that are free to the provider through a source other than the VFC program, including doses purchased by public health departments. When billing code 90471, providers must indicate the vaccine administered and its source in the Remarks field (Box 80)/Additional Claim Information field (Box 19) of the claim. Code 90471 may not be billed in conjunction with other vaccine immunization codes (90284 – 90749 and X5300 – X7699) administered by the same provider, for the same recipient and date of service.

BCG Vaccine

BCG Vaccine U.S.P. is an attenuated, live culture preparation of the Bacillus of Calmette and Guerin (BCG) strain of Mycobacterium bovis for percutaneous use.

Indications

All ACIP-recommended indications

Dosages and Schedules

ACIP-recommended dosages and dosing schedules

Age Limits

All ages

Billing

CPT code 90585 (Bacillus Calmette-Guerin vaccine (BCG) for tuberculosis, live, for percutaneous use)

Required Modifier

SK (member of a high-risk population)

Cholera

Cholera vaccine is live, attenuated bacterial vaccine suspension containing the Vibrio cholerae strain CVD 103-HgR for oral administration (PO).
Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
18 to 64 years of age

Billing
CPT code 90625 (Cholera vaccine, live, adult dosage, 1 dose schedule, for oral use)

Required Modifier
SK (member of a high-risk population)

Diphtheria and Tetanus (DT)
Diphtheria and Tetanus Toxoids Adsorbed (DT) is a suspension of (DT) diphtheria and tetanus toxoids adsorbed on aluminum phosphate for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 weeks through 6 years of age (prior to 7th birthday)

Billing
CPT code 90702 (Diphtheria and tetanus toxoids adsorbed (DT) when administered to individuals younger than 7 years, for intramuscular use)
Required Modifier

SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Medi-Cal does reimburse for the DT vaccine (CPT code 90702) when administered to recipients younger than 7 years of age. Providers must not use modifier SL when billing this code for recipients who qualify for the VFC program since providers are able to bill for the vaccine and the administration fee. For claim preparation information, see “Required Documentation” in the Vaccines For Children (VFC) Program section of this manual.

Diphtheria, Tetanus, and Acellular Pertussis (DTaP)

Diphtheria and Tetanus Toxoids and acellular Pertussis Vaccine Adsorbed (DTaP) is a suspension of pertussis antigens and diphtheria and tetanus toxoids adsorbed on aluminum phosphate for intramuscular (IM) administration.

Indications

All ACIP-recommended indications

Dosages and Schedules

ACIP-recommended dosages and dosing schedules

Age Limits

6 weeks through 6 years of age (prior to 7th birthday)

Billing

CPT code 90700 (Diphtheria, tetanus toxoids, and acellular pertussis vaccine (DTaP), when administered to individuals younger than 7 years, for intramuscular use)

Required Modifier

SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Diphtheria, Tetanus, and Acellular Pertussis- Hepatitis B- Poliovirus (DTaP-HepB-IPV)

Diphtheria and Tetanus Toxoids and Acellular Pertussis Adsorbed, Hepatitis B (Recombinant) and Inactivated Poliovirus Vaccine (DTaP- HepB-IPV) is a suspension for intramuscular (IM) administration.
Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 weeks through 6 years of age (prior to 7th birthday)

Billing
CPT code 90723 (Diphtheria, tetanus toxoids, and acellular pertussis vaccine, hepatitis B, and inactivated poliovirus vaccine (DTaP-HepB-IPV), for intramuscular use

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Diphtheria, Tetanus, and Acellular Pertussis- Poliovirus (DTaP-IPV)
Diphtheria and Tetanus Toxoids and Acellular Pertussis Adsorbed and Inactivated Poliovirus Vaccine (DTaP-IPV) is a suspension for Intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
Age 4 through 6 years of age (prior to 7th birthday)
Billing
CPT code 90696 (Diphtheria, tetanus toxoids, acellular pertussis vaccine and inactivated poliovirus vaccine (DTaP-IPV), when administered to children 4 through 6 years of age, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Diphtheria, Tetanus, and Acellular Pertussis- Poliovirus-Haemophilus B Conjugate (DTaP-IPV/Hib)**

Diphtheria and Tetanus Toxoids and Acellular Pertussis Adsorbed, Inactivated Poliovirus Vaccine, and Haemophilus B Conjugate (Tetanus Toxoid Conjugate) vaccine (DTaP-IPV/Hib) is a suspension for intramuscular (IM) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
6 weeks through 4 years of age (prior to the 5th birthday)

Billing
CPT code 90698 (Diphtheria, tetanus toxoids, and acellular pertussis vaccine, *Haemophilus influenzae* type b, and inactivated poliovirus vaccine (DTaP-IPV/Hib), for intramuscular use

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Hepatitis A (HepA)**
Hepatitis A Vaccine (HepA) is a suspension for intramuscular (IM) administration.
**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
12 months and older

**Billing**
CPT code 90632 (Hepatitis A vaccine (HepA), adult dosage, for intramuscular use)
CPT code 90633 (Hepatitis A vaccine (HepA), pediatric/adolescent dosage-2 dose schedule, for intramuscular use)

**Required Modifier**
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Hepatitis A-Hepatitis B (HepA-HepB)**
Hepatitis A & Hepatitis B (Recombinant) Vaccine (HepA-HepB) is a suspension for intramuscular (IM) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
18 years and older

**Billing**
CPT code 90636 (Hepatitis A and hepatitis B vaccine (HepA-HepB), adult dosage, for intramuscular use)
Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Hepatitis B (HepB)
Hepatitis B Vaccine (Recombinant) (HepB) is a suspension for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
All ages

Billing
CPT code 90744 (Hepatitis B vaccine (HepB), pediatric/adolescent dosage, 3 dose schedule, for intramuscular use)
CPT code 90743 (Hepatitis B vaccine (HepB), adolescent, 2 dose schedule, for intramuscular use)
CPT code 90746 (Hepatitis B vaccine (HepB), adult dosage, 3 dose schedule, for intramuscular use)
CPT code 90740 (Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 3 dose schedule, for intramuscular use)
CPT code 90739 (Hepatitis B vaccine (HepB), adult dosage, 2 dose schedule, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.
Haemophilus b Conjugate (Hib (PRP-OMP))
Haemophilus b Conjugate Vaccine [Meningococcal Protein Conjugate] (Hib (PRP-OMP)) is a suspension for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 weeks and older

Billing
CPT code 90647 (Haemophilus influenza type b vaccine (Hib) PRP-OMP conjugate, 3 dose schedule, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Haemophilus b Conjugate (Hib (PRP-T))
Haemophilus b Conjugate Vaccine [Tetanus Toxoid Conjugate] (Hib (PRP-T)) is a suspension for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 weeks and older
Billing
CPT code 90648 (Haemophilus influenza type b vaccine (Hib) PRP-T conjugate, 4 dose schedule, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Human Papillomavirus 9-valent Vaccine, Recombinant (9vHPV)**
Human papillomavirus 9-valent (types 6, 11, 16, 18, 31, 33, 45, 52, 58) vaccine, recombinant, is a suspension for intramuscular (IM) administration

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
9 to 45 years of age

Billing
CPT code 90651 (Human Papillomavirus vaccine types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent [9vHPV], 2 or 3 dose schedule, for intramuscular use)

**Influenza Vaccine**
See the Vaccines For Children (VFC) program and the Presumptive Eligibility for Pregnant Women (PE4PW) sections in this manual.

**Influenza Inactivated (IIV3) or (IIV4)**
Influenza inactivated vaccine is a suspension of inactivated influenza viruses for intramuscular (IM) administration.
Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 months of age and older

Billing
CPT code 90656 (Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage, for intramuscular use)
CPT code 90658 (Influenza virus vaccine, trivalent (IIV3), split virus, 0.5 mL dosage, for intramuscular use)
CPT code 90685 (Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.25 mL dosage, for intramuscular use)
CPT code 90686 (Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.5 mL dosage, for intramuscular use)
CPT code 90687 (Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.25 mL dosage, for intramuscular use)
CPT code 90688 (Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.5 mL dosage, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Influenza Adjuvanted (aIIV3)
Influenza vaccine, adjuvanted (aIIV3) is a suspension of inactivated influenza viruses for intramuscular (IM) injection.

Indications
All ACIP-recommended indications
**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
65 years of age and older

**Billing**
CPT code 90653 (Influenza vaccine, inactivated (IIV), subunit, adjuvanted, for intramuscular use)

**Influenza High Dose (IIV3-HD)**
Influenza vaccine, high dose (IIV3-HD), is a suspension of inactivated influenza viruses for intramuscular (IM) injection.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
65 years of age and older

**Billing**
CPT code 90662 (Influenza virus vaccine (IIV), split virus, preservative free, enhanced immunogenicity via increased antigen content, for intramuscular use)

**Influenza Live (LAIV4)**
Influenza Vaccine Live (LAIV4) is a quadrivalent suspension of live, attenuated influenza subtypes A and type B viruses for intranasal (IN) administration.

**Indications**
All ACIP-recommended indications
Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
2 through 49 years of age

Billing
CPT code 90672 (Influenza virus vaccine, quadrivalent, live, (LAIV4), for intranasal use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Influenza Recombinant (RIV4)
Influenza Vaccine Recombinant (RIV4) is a quadrivalent suspension of recombinant HA proteins of influenza virus subtypes A and type B.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
18 years of age and older

Billing
CPT code 90682 (Influenza virus vaccine, quadrivalent (RIV4), derived from recombinant DNA, hemagglutinin (HA) protein only, preservative and antibiotic free, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.
Japanese Encephalitis
Japanese encephalitis vaccine is a reconstituted suspension of inactivated Japanese encephalitis virus for intramuscular (IM) injection.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
2 months and older

Billing
CPT code 90738 (Japanese encephalitis virus vaccine, inactivated, for intramuscular use)

Required Modifier
SK (member of a high-risk population)

Meningococcal Conjugate (MenACWY)
Meningococcal (Groups A, C, Y, and W-135) conjugate vaccine is a suspension for intramuscular (IM) injection

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
2 months and older
Billing
CPT code 90734, Meningococcal conjugate vaccine, serogroups A, C, W, Y, quadrivalent, diphtheria toxoid carrier (MenACWY-D) or CRM197 carrier (MenACWY-CRM), for intramuscular use

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Meningococcal Group B (MenB-4C)
Meningococcal Group B Vaccine (MenB-4C) is a suspension for intramuscular (IM) injection

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
10 to 25 years of age

Billing
CPT code 90620 (Meningococcal recombinant protein and outer membrane vesicle vaccine, serogroup B (MenB-4C), 2 dose schedule, for intramuscular use)

Required Modifier
SK (member of a high-risk population)
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Meningococcal Group B (MenB-FHbp)
Meningococcal Group B Vaccine (MenB-FHbp) is a suspension for intramuscular (IM) injection
Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
10 to 25 years of age

Billing
CPT code 90621 (Meningococcal recombinant lipoprotein protein vaccine, serogroup B (MenB-FHbp), 2 or 3 dose schedule, for intramuscular use)

Required Modifier
SK (member of a high-risk population)
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Measles, Mumps, and Rubella (MMR)
Measles, Mumps, and Rubella Vaccine Live (MMR) is a reconstituted suspension for subcutaneous (SQ) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
12 months and older

Billing
CPT code 90707 (Measles, mumps, and rubella virus vaccine (MMR), live, for subcutaneous use)
Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Measles, Mumps, Rubella, and Varicella (MMRV)**
Measles, Mumps, Rubella, and Varicella Vaccine Live (MMRV) is a reconstituted suspension for subcutaneous (SQ) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
12 months through 12 years (before the 13th birthday)

**Billing**
CPT code 90710 (Measles, mumps, rubella, and varicella vaccine (MMRV), live, for subcutaneous use)

**Required Modifier**
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Polio**
Poliovirus Vaccine Inactivated (IPV) is a suspension for intramuscular (IM) or subcutaneous (SQ) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules
Age Limits
6 weeks of age and older

Billing
CPT code 90713 (Poliovirus vaccine, inactivated (IPV) for subcutaneous or intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Pneumococcal 13-Valent Conjugate (PCV13)
Pneumococcal 13-valent Conjugate Vaccine (PCV13) is a suspension for intramuscular (IM) injection.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 weeks of age and older

Billing
CPT code 90670 (Pneumococcal conjugate vaccine, 13 valent (PCV13), intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.
**Pneumococcal Polysaccharide 23-Valent (PPSV23)**

Pneumococcal polysaccharide vaccine polyvalent (PPSV23) is a solution of purified capsular polysaccharides from 23 serotypes of Streptococcus pneumoniae for intramuscular (IM) or subcutaneous (SQ) injection.

**Indications**

All ACIP-recommended indications

**Dosages and Schedules**

ACIP-recommended dosages and dosing schedules

**Age Limits**

2 years and older

**Billing**

CPT code 90732 (Pneumococcal polysaccharide vaccine, 23-valent (PPSV23), adult or immunosuppressed patient dosage, when administered to individuals 2 years or older, for subcutaneous or intramuscular use)

**Required Modifier**

SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Rabies**

Rabies vaccine is a reconstituted suspension of inactivated rabies virus for intramuscular (IM) injection.

**Indications**

All ACIP-recommended indications

**Dosages and Schedules**

ACIP-recommended dosages and dosing schedules

**Age Limits**

All ages

Part 2 – Immunizations
**Billing**
CPT code 90675 (Rabies vaccine, for intramuscular use)

**Required Modifier**
SK (member of a high-risk population)

**Rotavirus (RV1)**
Rotavirus vaccine is a suspension of live, attenuated human (RV1) G1P [8] rotavirus for oral (PO) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
6 to 24 weeks of age

**Billing**
CPT code 90681 (Rotavirus vaccine, human, attenuated (RV1), 2 dose schedule, live, for oral use)

**Required Modifier**
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Rotavirus (RV5)**
Rotavirus vaccine (RV5) is a solution of five live human-bovine reassortant rotaviruses for oral (PO) administration.

**Indications**
All ACIP-recommended indications
Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
6 to 32 weeks of age

Billing
CPT code 90680 (Rotavirus vaccine, pentavalent (RV5), 3 dose schedule, live, for oral use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Tetanus and Diphtheria (Td)
Tetanus and Diphtheria Toxoids Adsorbed (Td) is a suspension for intramuscular (IM) administration

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
7 years and older

Billing
CPT code 90714 (Tetanus and diphtheria toxoids adsorbed (Td), preservative free, when administered to individuals 7 years or older, for intramuscular use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.
**Tetanus, Diphtheria, and Acellular Pertussis (Tdap)**

Tetanus Toxoid, Reduced Diphtheria Toxoid and Acellular Pertussis Vaccine Adsorbed (Tdap) is a suspension for intramuscular (IM) administration.

**Indications**

All ACIP-recommended indications

**Dosages and Schedules**

ACIP-recommended dosages and dosing schedules

**Age Limits**

7 years and older

**Billing**

CPT code 90715 (Tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap), when administered to individuals 7 years or older, for intramuscular use)

**Required Modifier**

SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

**Typhoid polysaccharide (ViCPs)**

Typhoid Vi polysaccharide vaccine (ViCPs) is a solution containing the cell surface Vi polysaccharide extracted from *Salmonella enterica* serovar *Typhi*, *S. typhi* Ty2 strain for intramuscular (IM) administration.

**Indications**

All ACIP-recommended indications

**Dosages and Schedules**

ACIP-recommended dosages and dosing schedules

**Age Limits**

2 years and older
Billing
CPT code 90691 (Typhoid vaccine, Vi capsular polysaccharide (ViCPs), for intramuscular use)

Required Modifier
SK (member of high-risk population)

**Typhoid Live Oral (Ty21a)**
Typhoid vaccine live oral (Ty21a) is a live, attenuated vaccine for oral administration. The vaccine contains the attenuated strain of serovar *Salmonella typhi* Ty21a.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
6 years and older

Billing
CPT code 90690 (Typhoid vaccine, live, oral)

Required Modifier
SK (member of high-risk population)

**Varicella (VAR)**
Varicella Virus Vaccine Live (VAR) is a reconstituted suspension for subcutaneous (SQ) administration.

**Indications**
All ACIP-recommended indications
Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
12 months and older

Billing
CPT code 90716 (Varicella virus vaccine (VAR), live, for subcutaneous use)

Required Modifier
SL (state-supplied vaccine) must be used when administering vaccine supplied by the Vaccines for Children (VFC) program.

Yellow Fever
Yellow fever vaccine is a reconstituted suspension of live yellow fever virus for subcutaneous (SC) injection.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
9 months and older

Billing
CPT code 90717 (Yellow fever vaccine, live, for subcutaneous use)

Required Modifier
SK (member of a high-risk population)
Zoster Live (ZVL)
Zoster Vaccine Live (ZVL) is a reconstituted suspension for subcutaneous (SQ) injection.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
50 years and older

Billing
CPT code 90736 (Zoster (shingles) vaccine (HZV), live, for subcutaneous injection)

Zoster Recombinant (RZV)
Zoster Vaccine Recombinant, Adjuvanted (RZV) is a reconstituted suspension for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
50 years and older

Billing
CPT code 90750 (Zoster (shingles) vaccine (HZV), recombinant, subunit, adjuvanted, for intramuscular use)
Immune Globulins, Serum, Or Recombinant Products

**Hepatitis B Immune Globulin (HBlg)**

Hepatitis B Immune Globulin (HBlg) is a solution for intramuscular (IM) or intravenous (IV) administration.

**Indications**

All ACIP-recommended indications

**Dosages and Schedules**

ACIP-recommended dosages and dosing schedules

**Age Limits**

All ages

**Billing**

CPT code 90371 (Hepatitis B immune globulin (HBlg), human, for intramuscular use)

HCPCS code J1571 (Injection, hepatitis B immune globulin (HepaGam B), intramuscular, 0.5 ml)

HCPCS code J1573 (Injection, hepatitis B immune globulin (HepaGam B), intravenous, 0.5 ml)

**Immune Globulin (Human)**

Immune Globulin (Human) is a solution for intramuscular (IM) administration.

**Indications**

All ACIP and FDA-recommended indications

**Dosages and Schedules**

ACIP and FDA-recommended dosages and dosing schedules
Age Limits
All ages

Billing
HCPCS code J1460, Injection, Gamma Globulin, Intramuscular, 1 CC or J1560, Injection, Gamma Globulin, Intramuscular, Over 10 CC
Do not report claims with CPT code 90281 (Immune globulin (Ig), human, for intramuscular use)

Palivizumab
Palivizumab 50 mg, CPT code 90378 is reimbursable for passive immunization of certain infants as described below.

The following coverage policy was updated after the publication of the article titled, “Updated Guidance for Palivizumab Prophylaxis Among Infants and Young Children at Increased Risk of Hospitalization for Respiratory Syncytial Virus Infection” by American Academy of Pediatrics (AAP) in 2014.

Five monthly doses of palivizumab will provide more than six months (24 weeks) of protective serum antibody concentration. For children meeting the policy described below, up to five doses may be authorized for use between November and the following March. If prophylaxis is initiated in December, the fifth and final dose should be administered in April.

A maximum of five doses of palivizumab may be authorized as follows:

- Infants born before 29 weeks, 0 days gestation who are less than 12 months of age at the start of the RSV season
- During the first year of life for preterm infants who develop chronic lung disease (CLD) of prematurity defined as gestational age less than 32 weeks, 0 days and a requirement for greater than 21 percent oxygen for at least the first 28 days after birth
- During the second year of life for preterm infants who develop chronic lung disease (CLD) of prematurity as defined above and continue to require medical support (chronic corticosteroid therapy, diuretic therapy, or supplemental oxygen) during the six-month period before the start of the second RSV season
- Infants who are 12 months or younger with acyanotic heart disease who are receiving medication to control congestive heart failure and will require cardiac surgical procedures and infants with moderate to severe pulmonary hypertension
• Infants with cyanotic heart defects in the first year of life may receive palivizumab prophylaxis if deemed warranted by the infant’s pediatric cardiologist

• Children younger than two years who undergo cardiac transplantation during the RSV season

• An infant younger than 24 months receiving prophylaxis who undergoes cardiopulmonary bypass or extracorporeal membrane oxygenation and continues to require prophylaxis post-operatively may receive a post-operative dose of palivizumab (15 mg/kg)

• During the first year of life, infants with neuromuscular disease or congenital anomaly that impairs the ability to clear secretions from the upper airway because of ineffective cough

• Children younger than 24 months of age who are profoundly immunocompromised during the RSV season, as assessed by a qualified pediatric Infectious Disease or Immunologic specialist

• During the first year of life, infant with cystic fibrosis with clinical evidence of CLD and/or nutritional compromise

• During the second year of life, infants with cystic fibrosis and manifestations of severe lung disease (previous hospitalization for pulmonary exacerbation in the first year of life or abnormalities on chest radiography or chest computed tomography that persist when stable) or weight for length less than the 10th percentile

Note: Qualifying infants born during the RSV season may require fewer doses. For example, infants born in January would receive their last dose in March.

Authorization Required

Palivizumab is given by intramuscular injection on a monthly basis during the RSV season. A TAR is required. Providers may request the amount of palivizumab needed for the entire RSV season on one TAR. The usual dosage is 15 mg/kg per injection. One unit equals 50 mg for Medi-Cal billing purposes. Providers may bill for one unit even if only part of the unit was given to the recipient and the remainder of the drug was discarded. It is reimbursable once in a 25-day period.

Rabies Immune Globulins

Rabies immune globulin is a solution of globulins dried from the plasma or serum of selected adult human donors who have been immunized with rabies vaccine and have developed high titers of rabies antibody.
Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
All ages

Required ICD-10 Diagnosis Codes
Z20.3

Billing
CPT code 90375 (rabies immune globulin [Rig], human, for intramuscular use)
CPT code 90376 (rabies immune globulin, heat-treated [Rig-HT], human, for intramuscular and/or subcutaneous use)

Tetanus Immune Globulin (TtG)
Tetanus immune globulin, human (TtG), is solution for intramuscular (IM) administration.

Indications
All ACIP-recommended indications

Dosages and Schedules
ACIP-recommended dosages and dosing schedules

Age Limits
All ages

Billing
HCPCS code J1670, Injection, tetanus immune globulin, human, up to 250 units
Do not report claims for J1670 with CPT code 90389 Tetanus immune globulin (TtG), human, for intramuscular use
Varicella Zoster Immune Globulin

Varicella Zoster immune globulin is a solution for intramuscular (IM) administration.

**Indications**
All ACIP-recommended indications

**Dosages and Schedules**
ACIP-recommended dosages and dosing schedules

**Age Limits**
All ages

**Billing**
CPT code 90396 (Varicella-zoster immune globulin, human, for intramuscular use)
