
Clinic Formulary

Page updated: September 2020

The following is a list of both prescription and over-the-counter drugs and contraceptive supplies that are reimbursable for clinic dispensing through the Family Planning, Access, Care and Treatment (Family PACT) Program. Guidelines for pharmacy and onsite dispensing may differ for some drugs. Restrictions are noted throughout this formulary.

Reimbursable regimens for the management of covered family planning-related conditions are listed in the “Treatment and Dispensing Guidelines for Clinicians” in the *Benefits Grid* section in this manual. The use of these drugs outside of the specified conditions is not reimbursable.

Drugs marked with a symbol (+) require a *Treatment Authorization Request (TAR)* for use in the treatment of the specified condition or complications of contraceptive methods and those arising from treatment of covered family planning-related conditions. Documentation of the condition or complication with the appropriate ICD-10-CM code must accompany the TAR. For additional information, refer to the *Treatment Authorization Request (TAR)* section in this manual.

Miscellaneous drugs for non-surgical procedures are billed with HCPCS code S5000 or S5001. These codes may be used only by hospital outpatient departments, emergency rooms, surgical clinics and community clinics, in accordance with Medi-Cal guidelines. For additional information, refer to *Drugs: Onsite Dispensing Billing Instructions* and *Drugs: Onsite Dispensing Price Guide* sections in this manual.
