
Modifiers Used With Vision Care Procedure Codes

Page updated: August 2020

This section provides information about commonly used modifiers for Vision Care providers. For a complete list of modifiers, refer to the *Modifiers: Approved List* section in this manual.

Inappropriate use of a modifier or using a modifier when it is not necessary will result in denial or a delay of claim reimbursement. Some CPT® codes, by nature of their description, are for the professional or technical component only. In these cases, a modifier will make the claim suspend unnecessarily.

The use of modifiers is an important part of billing for health care services. Modifiers are designed to give additional information for processing claims. Placement of a modifier after a CPT or HCPCS code does not ensure reimbursement. Documentation of medical necessity may also be necessary for certain procedure codes.

The following charts list procedure codes with their corresponding required or allowable modifiers. The column headings of the charts are described below.

Service or Procedure

The “Service or Procedure” column lists services according to the categories in the HCPCS and CPT code books.

Codes or Code Ranges

The “Codes or Code Ranges” column lists the specific code or range of codes that are being billed with required or allowable modifiers.

Required Modifiers

The “Required Modifiers” column refers to services or procedures that require a modifier for payment, or the claim will be denied.

Allowable Modifiers

The “Allowable Modifiers” column refers to certain modifiers that indicate that the procedure or service has been altered by some specific circumstance but not changed by definition.

For a list of approved modifiers, refer to the *Modifiers: Approved List* section in this manual.

Some procedures do not need further clarification with a modifier. Use of modifiers not listed on the following chart or required for National Correct Coding Initiative (NCCI) purposes may result in the claim being denied. Refer to the *Correct Coding Initiative: National* section in the appropriate Part 2 manual for additional information.

Physician Services

For information about modifiers used for physician services, refer to the *Modifiers* and *Ophthalmology* sections of the Part 2 manual, *General Medicine*.

Additional Modifier Information

For further information about required or allowable modifier usage for specific procedure codes, refer to specific policy sections in this manual.
